

BETTER WEATHER DATA FOR SPRAYING

40 brand new weather stations across the Mid-North, all freely accessible to the public

Temperature inversion,
grass fire danger index (GFDI)
and lots more live data available
from every station

This network of 40 automatic weather stations spreads across the region, from Jamestown and Port Pirie in the north, in and around the Clare Valley and almost to Two Wells in the south.

It provides a weather monitoring and warning system sufficient to provide highly accurate and targeted data on the development and presence of adverse conditions for spraying.

We'll give you access & help you interpret the data with 13 free workshops across the Mid-North

	Aug 28	Aug 29	Aug 30	Sept 2	Sept 3	Sept 5	Sept 6
