

HART WINTER WALK

July 21, 2026

9:00am - 12:30 pm at Hart

Morning tea provided

Proudly sponsored by
nufarm

Decision-making under the influence: exploring common biases

Review common biases and discover how they might shape your on-farm decisions.

Brendan Brown; CSIRO

Building better rotations: profit, risk and agronomic outcomes

Gain practical insights into the trade-offs between profit, reliability, and crop legacy effects when planning future cropping programs.

Craig Davis; Crop Consulting Services & Matthew Knowing; Adelaide University

Disease on the radar: pulse and cereal risks and management

A practical update on lentil and cereal disease in 2026, with a focus on identification, timing of control, and effective management.

Hari Dadu; SARDI Pathology & Jeff Braun; The Agronomist

Pre-em performance unpacked

Compare pre-emergent herbicide performance across different sowing scenarios and understand the factors that influence crop safety and weed control.

Chris Davey; Next Level Agronomy
